

Promoting sustainable use of underutilized lands for bioenergy
production through a web-based Platform for Europe

D7.5 - Video interviews with stakeholders

This project has received funding from the European Union's Horizon 2020
research and innovation programme under grant agreement No 818083.

Project no. 818083
Project acronym: BIOPLAT-EU
Project title: Promoting sustainable use of underutilized lands for bioenergy production through a web-based Platform for Europe
Call: H2020-LC-SC3-2018-RES
Start date of project: 01.11.2018
Duration: 36 months
Deliverable title: D7.5 - Video interviews with stakeholders
Due date of deliverable: 30 October 2020
Project Coordinator: WIP Renewable Energies
Organisation name of lead contractor for this deliverable: GEONARDO (3)

1 Introduction

This document has been produced with the objective to present the stakeholder video interviews concluded in the period of M13 and M26 of the BIOPLAT-EU project. The video interviews with stakeholders aimed at presenting economically viable and bankable aspects of possible case studies.

2 Stakeholder video interview in Germany

The interview was conducted with Mr. Heiko Terno, Vice President of the Landesbauernverbands Brandenburg e.V. / Landwirt. The main topic of the interview was the application of bioenergy in the Lausitz region, with special focus on bionenergy potentials and challenges.

3 Stakeholder video interview in Hungary

The Hungarian video interview was prepared with Ms. Anikó Cserjés, landowner in the South-Hungarian region. The interview mainly addressed the methods of BIOPLAT-EU and how the project results could provide some basic fundamentals and insights to improve farming on underutilised lands in sandy lands.

4 Stakeholder video interview in Italy

In this video the president of Greenswitch was interviewed. Greenswitch is a private enterprise working in the sector of bioeconomy, with a focus on biodiesel, based in the Basento Valley in Basilicata. Ms. Antonella Russo explained that the company intends to implement the paradigm shift proposed by the bioeconomy, alongside a more ambitious project that aims to build a short and local based value chain, following the “circular economy” principle.

6 Stakeholder video interview in Spain

The Spanish video interviewed two stakeholders simultaneously, Mr. Eng. Aníbal Capuano, technical director of the processing oil plant at Camelina Spain and Mr. Eng. Vicente Bodas agronomist engineer and farm director. The main topic of the interview was the potential of camelina as biofuel at marginal dry land areas in Spain.
