

5th NEWSLETTER

Welcome to the fifth edition of the BIOPLAT-EU Newsletter!

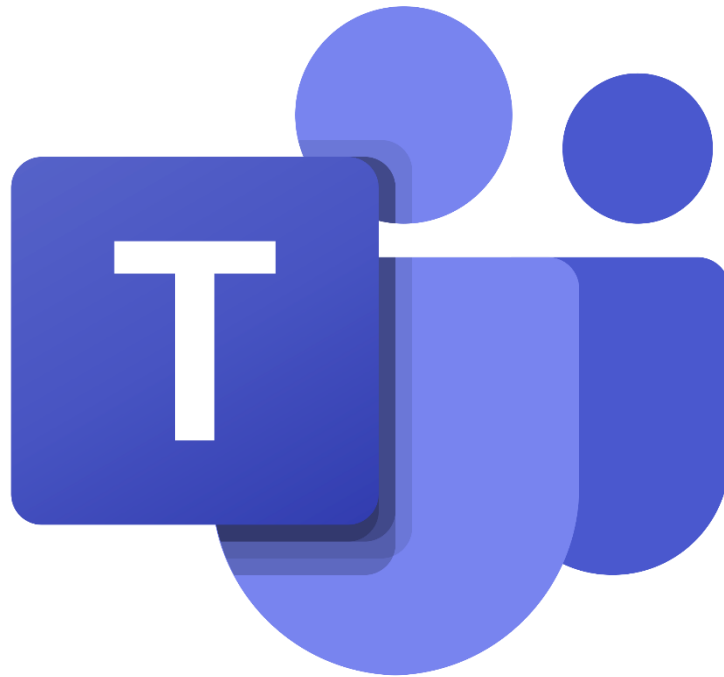

The objective of the project is to promote the market uptake of sustainable bioenergy in

Europe using marginal, underutilized, and contaminated (MUC) lands for non-food biomass production through the provision of a web-based platform that serves as decision support tool.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 818083. This newsletter reflects only the author's view and that the European Commission is not responsible for any use that may be made of the information it contains.

Fifth Project Meeting

The fifth project meeting will be organised on 10 November 2020 online in Teams. The objective of the event will be to discuss ongoing work packages and initiate the activities of stakeholder engagement, creation of working groups in the case study countries.

The first working group meeting of BIOPLAT-EU will be launched in Ukraine

SECBio is organising an online seminar that will take place within the BIOPLAT-EU project. Learn more about legal support, barriers, and prospects for growing energy crops in Ukraine, as well as the experience of leading Ukrainian companies in building their own business for growing energy crops. For whom is this seminar? For biomass suppliers, government officials, politicians, equipment manufacturers, scientists, representatives of financial institutions, investors, entrepreneurs interested in growing energy crops.

BIOMASS

9.09.20

10:00-12:30

Участь безкоштовна*
*Для участі у семінарі необхідно зареєструватися.

Енергетичні культури для біоенергетичних проєктів: перспективи для України
Онлайн-семінар

Спікери:

Кирило Томляк,
менеджер Програми ЄБРР

Юрій Шафаренко,
заступник голови Держенергоефективності

Георгій Гелетука,
голова правління УАВІО

Олександра Трибой,
старший консультант НТЦ «Біомаса»

Ірина Гнап,
директор Salix Energy

Михайло Гументик,
завідувач лабораторією Інституту біоенергетичних культур і цукрових буряків НААН України

Next related event: 3rd IRENA Innovation Week

The 3rd IRENA Innovation Week (IVIW2020) will take place online during 5-8 October 2020 under the theme *“Renewable solutions for transport and industry”*. The IRENA Innovation Week series has become a landmark biennial event to discuss the latest innovations that will lead to a global energy transition. The 2016 and 2018 editions focused on the energy supply side, exploring zero-carbon power systems based on integrating high-shares of renewables. The third edition of the IRENA Innovation Week will move into the energy demand side by providing important new insights into challenges, opportunities and emerging solutions for end-use energy sector decarbonisation.

WIP will present the results of the BIOPLAT-EU project at the event.

Related project: ISABEL

The ISABEL project aims to foster the concept of community biogas and lead the way for its market take-up based on a vision that includes three core interacting elements: (i) local production & consumption, (ii) community involvement, and (iii) sustainable biogas.

ISABEL is about promoting, supporting and developing community biogas in Europe. The project is set on providing all the framework conditions for biogas communities to shape, develop and thrive and works on all angles in order to take full advantage of the societal benefits of local community-driven biogas systems, fuelled and inspired by social innovation principles.
